Applicant(s)

TROCKI ET AL.

Examiner

Elizabeth R. MacNeill

Art Unit

3767

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 9/27/07.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 27 September 2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Reilly et al (US 5,779,675).

Reilly teaches a syringe for use with an injector comprising a body (118), a plunger (26), an attachment member (126) at the frontward end of the body; and a rotation member comprising a recess (120) formed in the body for retaining a corresponding mechanism on the injector (133). See Fig 11.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3767

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-11 and 21-24 are rejected under 35 U.S.C. 103(a) as being obvious over Reilly et al in view of Dragon (US 4,472,141).

Reilly et al teaches a syringe for use with an injector comprising a body (118), a plunger (26), an attachment member (126) at the frontward end of the body; and a rotation member comprising a recess (120) formed in the body for retaining a corresponding mechanism on the injector (133). See Fig 11. The attachment member is an annular ridge (126) which is also a projection or tab member. See Fig 10. Regarding claims 10 and 11, depending on the orientation of the powerhead of the injector, the attachment member could be moved in either an axial or a vertical direction.

Reilly et al does not teach an encoding device located on the body of the syringe.

Dragon teaches a syringe body (60) for use with an injector (21) where the syringe body is color-coded (Abstract). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the known technique of color-coding a syringe with the device of Reilly in order to provide an indication of the medication contained with the syringe or the size of the syringe, for example.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-11, 14, and 21-24 have been considered but are moot in view of the new ground(s) of rejection.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.
